

BAQUA Spa® / Bromine-Free, Chlorine-Free Core Products

Start spending less time on the spa and more time in it!

Spa care simplified, your time multiplied. That's the advantage of easy to use chlorine-free, bromine-free BAQUA Spa® products for your spa care routine. When you add it all up, the results are always the same—water that feels fresh and soft on your skin in mere minutes. Crystal-clear water with no harsh odor and long-lasting bacteria control make BAQUA Spa® a refreshing difference! It is bromine-free and chlorine-free, giving you the ultimate aaahhh experience.

Open your eyes to perfect relaxation!

BAQUA Spa® Sanitizer with Stain & Scale Control - Pint

The principal ingredient in the BAQUA Spa® Water Care System. A bromine-free, chlorine-free liquid sanitizer that provides effective control of bacteria and protects against staining and discoloration due to metals. It stores indefinitely, is highly stable at elevated temperatures and lasts longer than chlorine or bromine. Step 3 of the BAQUA Spa® 3-part system.

AVAILABLE SIZE: 16 fl. oz. | 20 units per case

BAQUA Spa® Oxidizer

A liquid oxidizer consisting of specially stabilized hydrogen peroxide. Keeps spa water sparkling clear by oxidizing organic compounds. Step 2 of the BAQUA Spa® 3-part system.

AVAILABLE SIZES: 32 fl. oz. | 12 units per case

AVAILABLE SIZES: 2-Pack: 2 x 32 fl. oz. bottles | 6 units per case

BAQUA Spa® Waterline Control

A unique, patented formula that prevents formation of waterline deposits on the spa shell. Step 1 of the BAQUA Spa® 3-part system.

AVAILABLE SIZE: 32 fl. oz. | 12 units per case

BAQUA Spa® 4-Way Test Strips

- Exclusive Single Dip Technology!
- Tests: Baqua Spa® Sanitizer, pH, Total Alkalinity & Hardness
- 25 Strips

AVAILABLE SIZE: Each bottle contains 25 test strips | 12 units per case

BAQUACIL® / Product Quality. Chemical Superiority. Chlorine Free!

Enjoy the Good Life

Imagine crystal clear water with no irritated eyes. Only BAQUACIL® makes it possible.

BAQUACIL® provides innovative, protection against bacteria and algae. You can convert to a chlorine-free BAQUACIL® pool in as little as 24 hours and not need to drain the pool. And, the chemistry of the BAQUACIL® brand is not affected by sunlight or heat, lasting longer to give you consistent bacteria control.

BAQUACIL® CDX™ System Kit

The BAQUACIL® CDX™ System is a chlorine-free system specially formulated to maintain a consistent oxidizer residual in pool water. The oxidizer residual in pool water plays a significant role in removing contaminants that put a strain on the pool and keeping the pool clear all season long. Better still, this system is ideal for all pools.

Here's how it works:

- Step 1: Sanitize with: 1 x 96 oz BAQUACIL® Swimming Pool Sanitizer and Algistat
- Step 2: Oxidize with: 2 x 96 oz BAQUACIL® Oxidizer
- Step 3: Maintain oxidizer residual and water clarity with 1 x 96 oz BAQUACIL® CDX™ product

For areas where algae problems are prevalent or in pools with a history of recurring algae, a preventative dose of BAQUACIL® Algicide or BAQUACIL® Performance Algicide may be added to the weekly BAQUACIL® CDX™ System routine during the hottest months of the summer. Be sure to follow label directions for dosage recommendations.

BAQUACIL® CDX™ SYSTEM KIT

All you need to convert a pool owner to the BAQUACIL® CDX™ System.

Treats up to 15,000 gallons. The kit includes:

- 1 x 96oz. BAQUACIL® Swimming Pool Sanitizer & Algistat
- 2 x 96oz. BAQUACIL® Oxidizer
- 1 x 96oz. BAQUACIL® CDX™ Product
- 1 Start up/Conversion Instructions
- 1 BAQUACIL® 4-Way Test Strips (10 count)

BAQUACIL® Core Products

Every pool care regimen is supported by basic, but vital, building blocks that support a sound maintenance routine. With BAQUACIL's® Core Products, you have access to foundational items needed to get started and keep your pool crystal clear all season long.

BAQUACIL® Oxidizer

A chlorine-free liquid oxidizer formulated with specially-stabilized hydrogen peroxide used to clarify pool water by removing swimmer waste and other pool contaminants.

AVAILABLE SIZES: 1 gal | 4 units per case | 48 cases or pails per pallet

BAQUACIL® Swimming Pool Sanitizer and Algistat

The principle chemical in the BAQUACIL® Pool Care System is a polymer-based liquid sanitizer that provides safe, consistent control of bacteria and algae. It has a long shelf life, is highly stable in water and lasts longer than chlorine without any of chlorine's unpleasant side effects.

AVAILABLE SIZES: 1/2 gal | 4 units per case | 100 cases or pails per pallet

BAQUACIL® CDX® Product

A specially formulated product that is designed to maintain a residual BAQUACIL® Oxidizer level in pool water for clear water all season long.

AVAILABLE SIZES: 1/2 gal | 4 units per case | 100 cases or pails per pallet

BAQUACIL® Performance Algicide

A non-foaming supplemental algicide used to control the growth of algae in swimming pools. Highly effective against all types of algae.

AVAILABLE SIZES: 1 qt | 12 units per case | 56 cases or pails per pallet

BAQUACIL® Algicide

A liquid algicide of 50% alkyl dimethyl benzyl + dialkyl methyl benzyl ammonium chloride. Proven effective against a wide range of slime and algae, including common types such as green and black algae.

AVAILABLE SIZES: 1 qt | 15 units per case | 44 cases or pails per pallet

BAQUACIL® Premium Algicide

A specialized low foaming algicide used to remove existing algae growth in BAQUACIL® pools. Excellent formula for persistent, recurring algae. Not for use in chlorine pools.

AVAILABLE SIZES: 1 qt | 12 units per case | 56 cases or pails per pallet

BAQUACIL® 4-Way Test Strips

Easy to use, accurate test strips that measure pH, total alkalinity, BAQUACIL® Sanitizer and Algistat and BAQUACIL® Oxidizer. One dip gives fast results within 15 seconds. Test weekly for water clarity throughout the summer.

AVAILABLE SIZES: Each bottle contains 25 test strips | 12 units per case | 36 cases or pails per pallet

BAQUACIL® Support Products

Designed to help restore water clarity, control metals, clean filters and surfaces, and much more, BAQUACIL® brand's support products offer multiple solutions to common pool care issues.

BAQUACIL® Metal Control

Strongest chelating agent available for deactivating dissolved copper, iron and other heavy metals that can affect water clarity and sanitizer efficiency. Helps prevent discoloration of pool water and staining of pool sides and bottom. Not affected by extremes of temperature or pH. Contains no phosphates; will not promote algae growth.

AVAILABLE SIZES: 1.25 lb | 12 units per case

BAQUACIL® Backwash Filter Cleaner

Quick cleaning action with no soaking and no waiting. Effectively removes organic and inorganic buildup and cleans the sand particles as you backwash. Great results with no hassle.

AVAILABLE SIZES: 1 qt | 12 units per case | 56 cases or pails per pallet

BAQUACIL® Flocculant

An iron-free aluminum sulfate compound used to treat persistent haze. Used for years by municipal water authorities, now available for treating cloudy conditions and clarifying swimming pool water.

AVAILABLE SIZES: 1.5 lb | 18 units per case | 48 cases or pails per pallet

BAQUACIL® Liquid Flocculant

A fast acting liquid flocculant that will not affect water balance. Helps remove dead algae and various suspended debris that contribute to cloudy water. Easy to vacuum.

AVAILABLE SIZES: 1 qt | 12 units per case | 56 cases or pails per pallet
