

Balancers

Properly balanced water prevents corrosion and staining and optimizes the performance of your sanitizer. Pool Season simplifies this balancing act, giving you perfect pH, total alkalinity and calcium hardness for water comfort.

Calcium Increaser

Increasing your calcium hardness level prevents your pool water from becoming corrosive and protects your pool and pool equipment. Pool Season's increaser helps prevent etching and staining and is easy to apply.

Alkalinity Up

Easy-to-use, this granular product raises total alkalinity in the pool and acts as a buffer to prevent pH bounce, staining and corrosion.

Conditioner

Cut down on chlorine loss caused by the sun with this granular form conditioner. With 100% cyanuric acid stabilizer, chlorine is contained in your pool water where it continues its job of killing bacteria and keeping your pool clean and clear.

pH Minus

A convenient granular product that slowly lowers the pH in your water. The easy-to-use chemical is more convenient than liquid acids but just as effective in both pools and spas.

pH Plus

When your pH dips below the proper range of 7.2-7.6, pH Plus provides a convenient solution. The granular product is safe for all pool types and causes minimal effects on the overall alkalinity of the pool water. Product of choice for balancing water.

Oxidizers

The environment, swimmers and weather can introduce germs, algae and organic contaminants into your pool. To restore your pool's luster, use Pool Season oxidizing agents.

ShockWave

Calcium Hypochlorite with the shocking power of 68% available chlorine, this shock is available in a variety of convenient sizes.

Super ShockWave

Calcium Hypochlorite takes ShockWave to a new level with 73% available chlorine.

Sanitizers

The key to maintaining a crystal clear pool is a steady routine of sanitization. Pool Season sanitizers are designed to kill bacteria, algae and other living organisms.

Chlorinating Concentrate 56%

This quick dissolving concentrate with 56% available chlorine, leaves no residue to cloud the water and is ideal for all pool types.

Chlorinating Tablets

With chlorine and built in chlorine stabilizers, the 1-inch chlorinating tablets make proper chlorine level maintenance a breeze. These 1-inch tablets are well-suited for most automatic feeders and floaters.

Giant Size Chlorinating Tablets

Delivers the sanitizing power of 90% available chlorine. It is a potent protector for pools in full sunlight as the built in chlorine stabilizers work with the high-powered chlorine to maintain proper water chemical levels. The 3-inch tablets can be used in chlorine feeders, floaters and skimmers.

Bromine

Bromine offers an effective and reliable alternative to chlorine sanitization. Ideal for indoor pools and spas. Bromine tablets must be fed into a pool through a brominator.

Accessories

Clear up specific water problems with Pool Season accessories. The perfect complement to your pool care regimen, Pool Season offers a variety of cleaners, clarifiers and stain removers.

Stain and Scale Control

Safe for all pool types, this preventative's concentrated liquid formula fights back scale that forms from excessive calcium and staining brought on by iron, copper or manganese in your pool water.

Super Water Clarifier

A new phase in pool clarification, Pool Season's Super Water Clarifier is suitable for all pool types. The clarifier collects the miniscule particles in your pool water and bonds them together to create larger particles that can be removed through the filter. The cloudiness clears and you are left with crystal clear water.

Filter Cleaner

With so much chemical care focused on the pool water, it is important to remember the vital role your filter plays. At least twice a season, take the time to clean your filter with Pool Season's dual-action filter cleaner which removes scale and oils from all types of filters.

Granular Stain Control

Consists of a multiple acid formulation found to be extremely effective in removing both metal, and mineral stains from vinyl, fiberglass, plastic and tile pool surfaces. This product may not be used on acrylic spa surfaces.

Algaecides

Algaecides add an extra layer of pool protection, while creating a more pleasant swim environment. Pool Season algaecides safeguard your pool, preventing all types of algae.

Algaecide Control 30

This non-foaming, non-metallic 30% polyquat is a superior tool in preventing green, black and mustard algae. It is also ideal for use in pools with attached spas. Algaecide Control 30 should be used on a regular basis.

Algaecide Control 50

Broad range, non-metallic 50% strength quaternary ammonium algaecide. Effective in preventing the growth of all types of algae. An ideal addition for winter and off-season protection. Algaecide Control 50 should be used on a regular basis.

Algaecide Control 60

Like Algae Control 30, the 60 percent polyquat version is non-foaming and non-metallic so it also works well in pools with attached spas. Additionally, it has an appetite for green, black and mustard algae. Algaecide Control 60 should be used on a regular basis.

Concentrated Algae Kill II

Fast acting, triple chelated 7.4% copper algaecide designed to control mustard algae. Concentrated Algae Kill II should be used on a regular basis.
